COVID-19 Update
For Kitsap Economic Development Alliance

Keith Grellner, Administrator
February 18, 2021
Kitsap County COVID-19 Case Summary
**Kitsap COVID-19 Surveillance Report**

Please note that all rates, including the map, are delayed by 5 days to ensure data completeness. The counts (bottom of the page) are not delayed, but include all reported cases.

**Percent positivity and total negative testing data unavailable since 11/20/20.**

Rate of COVID-19 Cases per 100,000, Past 14 days*, Filter by Geographic Region

https://kitsappublichealth.org/CommunityHealth/CoronaVirus.php
Count of new COVID-19 Cases by Specimen Collection Date
Filter by Geographic Region, grey bar indicates potentially incomplete data

*Delayed by 5 days to account for data completeness
**Cases in isolation are confirmed/probable cases in Kitsap that are in isolation (10 days after first symptoms).
***Close contacts in quarantine are individuals determined to be close contacts by cases that are in quarantine (14 days after last contact with case).
****Number of vaccine doses administered from WA DOH dashboard
Grey area in bar graph indicates days most likely to have incomplete data.
Note: All data are preliminary and subject to change as more data becomes available.
### Rate of COVID-19 Cases per 100,000 Residents by Geographic Region in Past 14 Days*

Cases, contacts, deaths, and testing information is current as of 2/15/2021

Lab-confirmed Positive Tests in Kitsap Residents by Age Group

Percent of Positive Cases by Age Group from March 1, 2020 - February 6, 2021

- 0 to 9: 5%
- 10 to 19: 10%
- 20 to 29: 21%
- 30 to 39: 15%
- 40 to 49: 13%
- 50 to 59: 14%
- 60 to 69: 10%
- 70 to 79: 6%
- 80 over: 5%
Percentage of Positive Cases by Race and Ethnicity Compared to Population Percentages of Race and Ethnicity from March 1, 2020 - February 6, 2021

- 80% Non-Hispanic/Latino White (Positive Cases)
- 36% Non-Hispanic/Latino White (Total Population)
- 11% Hispanic/Latino (Positive Cases)
- 8% Hispanic/Latino (Total Population)
- 10% Non-Hispanic/Latino Non-White (Positive Cases)
- 13% Non-Hispanic/Latino Non-White (Total Population)
**Number of COVID-19 Patients Currently Admitted to a Hospital in Kitsap County**

The indicator shows the total number of hospital inpatients diagnosed with COVID-19 in Kitsap County hospitals. Inpatients may be residents of other counties, and therefore not be included in Kitsap County COVID-19 case numbers.

**Percentage of Patients Currently Admitted to an ICU in Kitsap County Who Have Been Diagnosed With COVID-19**

The indicator shows the percentage of intensive care unit (ICU) patients in Kitsap County hospitals who are COVID-positive. ICU patients may be residents of other counties, and therefore not be included in Kitsap County COVID-19 case numbers.
Kitsap County Hospital Bed Occupancy

Hospital bed occupancy is the percentage of hospital beds that are occupied out of the total number of licensed beds. It is important to note that filling all hospital beds is not always possible because most rooms in Kitsap are double occupancy. When a COVID-19 patient is in a room, the other bed in that room is counted as vacant, but the hospital is not able to use that bed.

Percent of Kitsap ICU Hospital Beds Occupied

This indicator shows the total percentage of all licensed intensive care hospital beds in Kitsap County that are occupied with patients.
Kitsap Resident COVID-19-related Deaths by Age

A COVID-19-related death is defined as a death of someone who has a lab-confirmed positive COVID-19 test and who died due to COVID-19 illness or complications related to COVID-19.

Wondering how much COVID-19 vaccine we get in Washington?

Right now, demand is higher than supply. Hang in there and eventually we'll have enough vaccine for everyone! Here is the latest on allocation for the week of February 22.

**COVID-19 Vaccine Allocation Update**

**ORDERING/RECEIVING**

**Washington state providers requested**

- **436,720**
  - **268,000** first doses
  - **168,720** second doses

**Washington will receive from the federal government**

- **263,570**
  - **146,110** first doses
  - **117,460** second doses

[Vaccine WA](https://CovidVaccineWA.org)

COVID-19 Vaccine Program
Vaccination Capacity

- Currently exceeds vaccine supply (considerably)
- 38 Providers enrolled, only 20 have received vaccines

Vaccines, not capacity, are needed!

More than 10,000 people get COVID-19 vaccine at state’s mass vaccination sites

OLYMPIA – Following a successful first week at the state’s four mass vaccination sites, the Washington State Department of Health (DOH) is pleased to announce registration is opening for week two.

Thanks to the hard work of DOH, the Washington National Guard, and local and private sector partners, as of January 29, more than 10,000 people got their COVID-19 vaccine at mass vaccination sites, including:

- 2,509 in Spokane
- 3,060 in Ridgefield
- 1,550 in Wenatchee
- 3,817 in Kennewick

SMMC-KPHD ~ 600-700 per day
- 2500 over one week
- 125% vaccines given < 1 week
- Volunteers and KPHD/KEOC staff
The vaccinators

As of 1/31, KPHD has 38 “enrolled providers”
- 7 of those enrolled providers are part of the same organization and are currently only providing vaccinations at one location
- 12 are pharmacies (1 of which is going out of business soon; 2 of them are currently independent pharmacies)
- 7 are specialty clinics (ophthalmology, general surgery, pediatrics)
- 22 have been allocated vaccine during this roll-out
Governor’s Healthy Washington - Roadmap To Recovery Metrics
Process Summary

- State Driven (vs. “Safe Start” and locally driven)
- DOH to publish reports every other Friday
- Three of 4 metrics must be met to move from Phase 1 to Phase 2
- Regional vs. county approach
- Only 2 Phases at this time
Metrics Summary
To Move from Phase 1 to Phase 2

1. Decreasing trend in 14-day rate/100,000
2. Decreasing trend in 14-day rate Hospital Admissions
3. Average 7-day percent occupancy of ICU staffed beds less than 90%
4. 7-day percent positivity less than 10%
Metrics Summary
To Remain in Phase 2

1. Decreasing or flat trend in 14-day rate/100,000
2. Decreasing or flat trend in 14-day rate Hospital Admissions
3. Average 7-day percent occupancy of ICU staffed beds less than 90%
4. 7-day percent positivity less than 10%

What Can We Do?

- Continue masking, distancing, avoiding crowds, symptom checking, stay home when ill, wash hands frequently
- Stay strong, be patient, watch data & announcements
- Support each other, support our community
- Get tested ASAP when ill
- Get vaccinated ASAP when time comes (Phases)
